SUSTAINABILITY PROGRAM AT ETC2026	At ETC, our dedicated team strives to create an experience that inspires and embodies a sustainable and clean future. We are committed to advancing the clean energy revolution by fostering innovation, sustainability, and social responsibility. View our sustainability mission, goals, and initiatives here: electricity-transformation.ca/sustainability/ .												

ONSITE BADGE REPRINTING POLICY	• Lost or damaged badges can be reprinted on site at the Registration Desk. • A replacement fee of \$50 will be charged. • Reprints will only be issued for the same individual and company as the original badge.
USE OF SPACE	Linear Booths • The maximum height of display in the rear half of booth is 8 ft. • The maximum height of display in the front half of the booth is 3 ft. • Display materials should be arranged in such a manner as not to obstruct sight lines of neighboring exhibitors. • No company logos, branding, or signage may face an adjoining booth, including booths on either side or behind. • Hanging signs and trusses are prohibited. • All machinery and other large products must be set back from the aisles by 6 inches for safety reasons.
BOOTH PERSONNEL	Booth personnel must maintain a professional appearance. All staff hired for the event (defined as any booth personnel who are not full-time employees of the exhibiting company, regardless of their gender) must wear business professional attire at ETC2026. The use of sexual or suggestive methods, partial nudity, the aggressive display of cleavage and the navel, and shorts/skirts higher than 4" above the knee are not allowed. If for any reason an exhibit and/or its contents are deemed objectionable to ETC2026 show management, the exhibitor will be asked to alter the content. ETC2026 show management further recommends that you encourage your booth personnel to: • Abstain from overt statements or offensive humor, which would disparage the dignity of any individual or group. • Substitute asexual words (e.g., sales representative or salesperson instead of salesman); refrain from using labels (e.g., referring to women as "girls"); and • Eliminate from all marketing collateral sexist language (i.e., replace masculine pronouns with he or she, or reword sentences or phrases) and discriminatory jokes or visual aids that show people in stereotypical roles by presenting individuals without bias regardless of sex, race, age, groups, etc. All booth personnel must wear conference badges
TERMS & CONDITIONS	Please note that by participating in this event, you agree to the linked Terms & Conditions

TEAR DOWN RESPONSIBILITY GUIDELINES

- Exhibitors & Sponsors are responsible for removing and securing their materials before dismantling their booth and display items.
- Any materials left behind will not be the responsibility of show management, the venue, or ANY show suppliers (i.e. Freeman).
- Any losses or damages will be at Exhibitors & Sponsors own risk.

VENUE GEOGRAPHICAL LAYOUT

D. ISLAND BOOTH

DEFINITION

Exhibit with one or more display levels in four or more standard Units with aisles on all four sides.

Height

Exhibit fixtures, components and identification signs will be permitted to a maximum height of 16'0" (4.88m), provided written approval is received from exposition management at least 60 days prior to the show.

Intent

When an island booth exceeds 8'3" (2.5m), it does not interfere with other exhibitors because it obviously does not back up against another exhibitor's back wall. The extra height is often required in an island booth exhibit to permit the open walk-through approach normally used in this type of location. The 16'0" (4.88m) maximum height limitation has been set to avoid undue competition between exhibitors to see who can go the highest or be seen the farthest with each negating the other's efforts. Also, the 16'0" (4.88m) high exhibit will fit into most exposition centres, thus permitting each exhibitor to get the maximum use of his or her exhibit.

Depth

Because an island booth is automatically separated by the width of an aisle from all neighboring exhibits, full use of the floor plan is permitted.

Intent

Exhibitors in the vicinity of island exhibits are entitled to the same reasonable safety precautions they would expect if they were adjacent to a standard booth.

Structural Integrity

All multi-story exhibits, regardless of whether people will occupy the upper area or not, and all exhibit fixtures and components 16'0" (4.88m) in height must have drawings available for inspection by exposition management, the installation and dismantling contractor, the exhibitor and governmental authority during the time the exhibit is being erected, exhibited and dismantled at the show site that include a signature or stamp of a reviewing structural engineer indicating that the structure design is properly engineered for its proposed use, and a signature of an authorized official of the exhibit building company indicating that the structure is built in compliance with the details and specifications set forth on the drawings. Signs must also be posted indicating the maximum number of people the structure will accommodate.

IMPORTANT

Exhibitors are cautioned when installing a display with a ceiling or second level to check with the local fire department to insure that their display meets with the necessary fire safety precautions involving smoke alarms, fire extinguishers, sprinkler systems, etc.

H. HANGING SIGNS

DEFINITION

An exhibit component suspended above an exhibit of four or more standard units back to back with an aisle on at least three sides for the purpose of displaying graphics or identification

Height

Standard Booth: 8'3" (2.5m)
Perimeter Booth: 12'0" (3.66m)
Peninsula Booth: 16'0" (4.88m)
Island Booth: 16'0" (4.88m)

Intent

Hanging signs are part of the overall exhibit presentation and, therefore, must be treated as a component of the total exhibit configuration. All signs, whether suspended or attached to the exhibit fixture, will be permitted to a maximum height that corresponds to the appropriate exhibit configuration.

Depth

All hanging signs must be set back at least 25% of the booth's width dimension from the back line of the booth.

Intent

Hanging signs, whether double-faced or not, should be set back within the exhibitor's space so as not to detract from the overall impact of the exhibit that is directly adjacent.

Size

Hanging signs and graphics will be permitted to a total length on each side of the exhibitor's space that does not exceed 50% of the corresponding dimension of the booth.

Intent

The size and number of hanging signs must be limited in order to minimize the stress to the facility ceiling structure on the part of any one exhibitor.

Structural Integrity

All hanging signs must have drawings available for inspection by exposition management, the installation and dismantling contractor, the exhibitor and governmental authority during the time the component is being hung, suspended and removed at the show site that include a signature or stamp of a reviewing structural engineer indicating that the stress points for hanging the sign have been properly engineered, and a signature of an authorized official of the exhibit building company indicating that the structure is built in compliance with the details and specifications set forth on the drawings. (Note: exhibitors are encouraged to use lightweight materials in the construction of a hanging sign to eliminate excessive stress to the facility ceiling structure.)

Intent

Exhibitors adjoining booths with hanging signs are entitled to the same reasonable safety precautions they would expect if they were adjacent to a standard booth.
